TEC

The torq TEC lay-up offers incredible durability with an improved flex pattern. The deck and rail lay-up is a 6oz and 4oz layer which allows the board much greater freedom of twist and flex. A 6oz deck patch ensures the same level of impact resistance, while the addition of a carbon filament stringer adds incredible longitudinal strength and response.

For mid-lengths and longboards the lay-up features a carbon stringer to the deck and bottom for a new level of torsional strength, plus 2 T-stringers on the longboards for additional responsive stiffness.

torq TEC uses genuine Futures fin boxes
